MOHITA S K

Redhills, Chennai – 600052 +91 7200639477 mohitask27@gmail.com
Portfolio (Projects & Certificates): mohita-portfolio.surge.sh

PROFESSIONAL SUMMARY:

Aspiring Computer Science Engineering undergraduate with a strong academic record and hands-on experience in Python, web technologies, artificial intelligence, and data analytics. Experienced in internships involving AI models and server-side web development. Skilled in data analysis, problem-solving, and teamwork. Seeking an Internship or entry-level role at Deloitte to apply analytical and technical skills to real-world business challenges.

EDUCATIONAL CONTOUR:

	CGPA:
Bachelorof Engineering– Computer Science and Engineering | Institution - JNN Institute of Engineering November 2022 - November 2026	9.34
HSC : St.Mary's Matric Higher SecondarySchool–Redhills June 2021 - May 2022 | English Medium	8.49
SSLC : St.Mary's Matric Higher SecondarySchool–Redhills June 2019 - May 2020 | English Medium	8.56

SKILLS:

Programming Languages:	Python, C (Beginner), Java (Beginner)
Web Technologies:	HTML, CSS
Data & Analytics:	Data Analysis Basics, Data Structuring, Debugging
AI &ML:	Python-based AI Models, NLP (Basics)
Tools:	VS Code
Core Skills:	Problem Solving, Logical Thinking, Analytical Reasoning
Soft skills:	Communication | Leadership | Time Management | Teamwork

INTERNSHIP EXPERIENCE:

1.Artificial IntelligenceIntern – INTRAINZ Oct 2023 – Nov 2023

- Worked on Python-based models and structured workflows
- Assisted in data preprocessing and basic model testing
- Improved logical thinking and analytical problem-solving skills

2.IT / Server-Side Intern – Chennai Port Trust Aug 2024 – Aug 2024

- Assisted in server-side web development using HTML
- Supported backend functionality testing and documentation
- Gained understanding of server operations and web structure
- Focused on performance, accuracy, and system reliability

PROJECTS:

1. FreshBasket – E-Commerce Grocery Website
Role: Project Manager | Developer | Tester
Technologies: Python, HTML, CSS

- Coordinated project planning and task execution
- Developed responsive web pages and user flows
- Implemented product listing and cart functionality

2. Fake Job Detection Using NLP & Email/Message Scanning
Role: Developer & Researcher
Technologies: Python, NLP

- Developing a system to identify fraudulent job postings
- Applied text analysis and basic NLP techniques
- Completed data collection and preprocessing stages

3. Optimum Vessel Turnaround Time Prediction (Ongoing)
Role: Data Analyst | Developer
Technologies: Python

- Currently developing a Python-based analytical model to estimate optimum vessel turnaround time
- Performing data collection and exploratory data analysis to identify factors impacting vessel delays
- Working on data cleaning, feature understanding, and preliminary analysis
- Aiming to support operational efficiency and decision-making through predictive insights

CERTIFICATES:

1.Introduction to IOT - 10th December 2022
2.Introduction to cloud computing - 09 December 2022
3.Introduction to Data Analytics - 09-December 2022

LANGUAGES KNOWN:

1.English - Proficient 2. Tamil - Native
